# CPRR Program Details

Dade Behring's CPRR Program is designed to allow the customer to customize for their laboratory. The CPRR process allows customers to pay directly on the basis of actual reportable results, improving the ability to predict patient volumes and manage budgets more effectively. Based on customer selection, the final CPRR price includes the Dimension chemistry analyzer and ancillary equipment, service, reagents, consumables, verifiers, and supplies. A Millipore water system and a one-year warranty are included. Please see the attached Product List for specific details of products included. Products not manufactured by Dade Behring are not part of the CPRR Program.

## CPRR Billing Process Requirements:

- Reportable Results include patient billable tests, studies and health fairs
- Dade Behring will provide expected quantities of CPRR product based on the estimated monthly commitment for each product.
- At program start up, the customer will purchase a one month supply of product as a "safety stock". Following that order, appropriate supplies will be shipped in at no charge to the customer and billing will occur once reportable results are transmitted to Dade Behring.
- Transmission of data must occur by the 5<sup>th</sup> of each month. If no transmission is received by the 15 of the month, Dade Behring may issue an estimated invoice.
- Full invoice payment is due no later than **30 days from invoice date**
- Customer Responsibilities
  - to generate the appropriate file type with required content
  - to provide set up of phone line, modem etc. to transmit data
  - to map the LIS mnemonics to Dade Behring mnemonics and create transmission files
  - to verify that LIS data is captured correctly in the transmission file
  - Update LIS mnemonics and data transmission files as new tests are added to the menu.
  - Customer will make available their books, documents, and records to certify the nature and number of Reportable Results transmitted under the agreement.

(for details around the CPRR submission and billing process, please contact Dade Behring).

## Maintenance and Repair / Service:

The customer is responsible for all daily, weekly and monthly routine operator maintenance and will record completion in maintenance log.

First year:        BN II                    Business Hours  
                      BN Prospec        Business Hours

**Subsequent years:** Select from the following options.

**Full Service Agreement (24/7):** includes preventive maintenance visits at the manufacturer's recommended intervals, unlimited service visits and all necessary replacement parts, excluding disposables and customer maintenance and operating supplies, twenty-four hours per day, seven days per week.

**Business Hours Agreement:** includes preventive maintenance visits at the manufacturer's recommended intervals, unlimited service visits and all necessary replacement parts, excluding disposables and customer maintenance and operating supplies, during normal business hours. Normal business hours are from 8:00 a.m. to 5:00 p.m. Monday through Friday, excluding holidays.

*Parts: All parts are included except those which are supplied with the initial shipment and are meant to last through the life of the equipment. These items include but are not limited to tools, alignment gages and segments. Although necessary, these items are not critical to instrument operation*

**Service Requests/Technical Assistance:** Customer may contact the Technical Assistance Center (hotline) twenty-four hours per day, seven days per week.. Customers are requested to contact the hotline for all inquiries, including technical assistance and service requests. If a service visit is needed, or requested, the Field Service Representative (FSR) receives notification from the Technical Assistance Center and then calls the customer and determines if additional parts or other resources may be needed to perform the requested service. An on site visit is scheduled with the customer.

**Technical Assistance Hotline: 1.800.644.3822 available 24/7**

## **Shipping and Handling:** **Standard Shipping and Handling**

Dade Behring provides shipping and handling for Government customers on routine shipments at no charge and applies to all 50 states, DC, and Puerto Rico.

Routine shipments are those that are placed using Dade Behring's primary shipping modes: "DRD" (Dedicated Truck Fleet) or "Dade Behring Select". The shipping mode for each customer is determined by Dade Behring based on geographical location.

### **"DRD" (Dade Dedicated Truck Fleet)**

Dade Behring uses dedicated fleets and other mode and carriers for delivery.

Locations that are receiving their shipments on the dedicated truck network will need to place their orders by the truck schedule for delivery the following week. The schedule is available online at [www.dadebehring.com](http://www.dadebehring.com).

The order to delivery lead time for DRD service is a maximum of seven business days.

### **Dade Behring Select**

"Select is a Dade Behring shipping process by which delivery is received within five business days of order placement. Dade Behring utilizes ground or air carriers to deliver the order depending on the nature of the products shipped and the distance to be shipped.

The maximum delivery lead time for Dade Behring Select service is five business days.

## **Expedited Shipping and Handling**

Dade Behring provides several additional methods for shipping and handling including:

- Two business day service
- Next business day service
- Next business morning service (where available)
- Saturday service (where available)
- Next Flight out service (where available)

Dade Behring ships temperature controlled products that are restricted from shipping over weekends and holidays. An extra business day or two may be required for orders that are scheduled to be in transit over week ends or holidays.

### **Charges for Expedited Shipping and Handling Services.**

The customer is responsible for all charges associated with expedited delivery. The charges are based on the net weight of the shipments.

Due to the complex nature of Dade Behring's shipping (Refrigerated, frozen, dry ice, hazardous, infectious substances) the shipping and handling charges for each shipping condition offered (Next Business Day, etc) are based on the average cost of shipping and handling for the shipping condition. The charge is, on average, the difference between the Standard Shipping and Handling Cost, and the cost for Expedited Shipping and Handling.

## Training:

**Upon Installation** - Dade Behring Inc will provide training at the Dade Behring manufacturing location for two operator at no charge to the Government. This includes airfare, room and board.

**Additional Training** in years 2 through 5 - Dade Behring will provide training at the manufacturer's facility for one operator per year (if requested by the customer). The Government agrees to cover airfare for the additional training. These classes cannot be carried over from one year to the next. Laboratories may train additional staff via **KnowIt<sup>sm</sup>** online training (details below) at no charge. Any requested incremental training (above that mentioned above) is offered at prices below.

<u>Equipment</u>	<u>Training Location</u>	<u># of Days</u>	<u>Price</u>
BNII	Glasgow, Delaware	4	\$1,875*
BN Prospec	Glasgow, Delaware	3	\$1,400*

\*does not include airfare

**KnowIt<sup>sm</sup>** interactive e-learning brings a virtual classroom right to your lab, providing a convenient and cost-effective way to move your staff up the learning curve quickly and manage long term knowledge development. Ready and available, KnowIt<sup>sm</sup> offers employees the flexibility to complete the course at his/her own pace and as schedules allow. It provides an interactive learning experience with instant feedback, reinforcement and motivation. Each module features pre and post-tests to measure performance. Test scores are then stored in a database. Online at [www.dadebehring.com](http://www.dadebehring.com)

Available for BN Prospec.

- Pre-training prior to attending a Dade Behring Class
- A tool with which classroom attendees can provide customer training back in the lab for the rest of the staff
- A quick reference and refresher tool

**Compliance** - Should the Customer fail to purchase in any calendar quarter at least three (3) times the Estimated Monthly Commitment for Tests in the aggregate or for any of the individual categories or products set forth therein, listed on Attachment A, Dade Behring, in addition to such other rights as are available by law, reserves the right to a) increase the minimum number of tests required for any subsequent periods to compensate for the shortfall, and/or b) immediately adjust the prices for any subsequent period to the appropriate tier on the Federal Supply Schedule based on the actual average volume and c) bill the Customer for the Minimum Monthly Fee according to the formula below for any months where Estimated Monthly Commitment was not met. New pricing and commitment amounts will be provided on an addendum. A signed addendum to the original contract with the new committed volume and pricing will be required.

### **Minimum Monthly Fee Formula -**

The amount of the cost of the use of the Equipment and service will be divided by the total Estimated Monthly Commitment of Tests as revised for the change in Test purchases. This amount ("Surcharge") is then added to the base reagent prices for which you are eligible according to the Federal Supply Schedule tiers based on the actual average volumes. The Customer acknowledges that the cost of your use of the Equipment is included in the price of the Tests.

**Exclusions:** Items not manufactured by Dade Behring, those not include on the Products List attached, product necessary for open channel or user defined tests, relocation of equipment, biomedical engineer training are excluded from the CPT Plus Program.

# Dade Behring Plasma Protein

The BN Systems (both Prospec and BNII) each offer a complete line of plasma protein methods. This extensive menu of assays provides cost-effective testing for a wide range of clinical indications.

## BN Prospec

The BN Prospec provides optimal throughput of 60-70 tests per hour, processes serum, plasma, CSF and urine samples simultaneously, is capable of testing RF, ASO and hsCRP on the same run. This fully automated BN Prospec combines efficient workflow with cost-effective determinations for laboratories with low to medium test volumes.

## BN II

The BNII system provides on-board capacity for up to 100 samples and 35 reagents and has the fastest throughput available at up to 225 tests per hour (theoretical) with a measuring time of 6 minutes. This fully automated nephelometer combines reliability with cost-effective performance for laboratories with medium to high test volumes.
