INFORMATION FOR ORDERING ACTIVITIES
V797P-7090a

1. **Table of Awarded Special Item Numbers:**
605-1a Clinical Chemistry Analyzers: High Complexity (Off-site training – two operators trained; three operators trained for UniCel® DxC 600i.)
2. **Maximum Order:** None
3. **Minimum Order:** Minimum per each instrument model
4. **Geographic Coverage:** Continental U.S., Hawaii and District of Columbia (Alaska, Puerto Rico and U. S. Trust territories excluded.)
5. **Points of Production:**
605-1a Brea (Orange County) California
6. **Discounts:** Prices shown are net of all discounts (1/2 of 1% Industrial Funding Fee will be added to each invoice effective 4-1-2008)
7. **Quantity Discounts:** None
8. **Payment Terms:** Net 30 days from date of invoice
9. **Credit Card:** Accepted, but no further discount given for credit card use.
10. **Foreign Items:** None
11. **Time of delivery:** 90 days after receipt of order
Urgent requirement pricing may be negotiated at the time of order
12. **F.O.B. Points:** Destination within Geographic coverage of contract.
13. **Ordering Address:** Beckman Coulter, Inc.
North America Commercial Operations (W-584)
200 S. Kraemer Blvd.
Brea, CA 92821
1-800-526-3821 – FAX 714-993-8884
14. **Payment Address:** Beckman Coulter, Inc.
Dept. CH 10164
Palatine, IL 60055-0164
15. **Warranty Provision:** All instrumentation will be warranted for the term of the pricing matrix chosen by each customer, up to five years.
16. **Export Packaging:** Not applicable
17. **Terms/Conditions of Government Commercial Credit Card Acceptance:**
No additional discounts given for using Credit Card.

INFORMATION FOR ORDERING ACTIVITIES – V797P-7090a (continued)

18. **Terms and Conditions of Rental, Maintenance and Repair:** Beckman Coulter will furnish:

A. Cost Per Test (CPT)

Beckman Coulter shall provide a price for each test that can be performed on its equipment. The per test price shall include costs covering (a) equipment use, (b) all reagents, standards, controls, supplies, consumable/disposable items, parts, accessories and any other item required for the proper operation of the contractor's equipment and necessary for the generation and reporting of a test result, (c) all necessary maintenance to keep the equipment in good operating condition (this element includes both preventive maintenance and emergency repairs) and (d) training for Government personnel. Delivery, installation, and removal of equipment is provided at no additional charge.

B. Cost Per Reportable Result (CPRR)

Beckman Coulter shall provide a price for a reportable patient result. The per reportable result price shall include costs covering (a) equipment use, (b) all reagents, standards, controls, supplies, consumable/disposable items, parts, accessories and any other item required for the proper operation of the contractor's equipment and necessary for the generation of a patient reportable result. This does not include those items approved for exclusion by the government such as printer paper, labels etc. This per patient reportable result price will also encompass all costs associated with dilution, repeat and confirmatory testing required to produce a single patient reportable result. It will also include the material to perform as well as all other costs associated with quality control, calibration and correlation study testing that is prescribed by National Committee for Clinical Laboratory Standards (NCCLS). (c) All necessary maintenance to keep the equipment in good operating condition (this element includes both preventive maintenance and emergency repairs) and (d) training for Government personnel. Delivery, installation, and removal of equipment is provided at no additional charge.

C. Instrumentation, supplies and consumables necessary to operate the equipment for all contracted tests except Group F (user-defined chemistries). The charge for tests run under Group F does not include reagents. Refer to Metering Guidelines and Exclusions.

D. Initial Training includes room, board, and airfare for off-site training. One additional training slot per instrument for each completed year of customer agreement is included upon request.

E. Maintenance and Repair: Customer is responsible for any daily routine maintenance. Beckman Coulter will perform ongoing preventive maintenance and emergency maintenance necessary to fulfill the customer's test requirements. Emergency maintenance will be provided within 24 hours of notification of malfunction (consultant with service option chosen). Beckman Coulter will provide all tools, parts and labor needed for emergency or preventive maintenance and will incur all related travel costs. Water system and maintenance to the water system is included and provided by outside vendor.

F. Billings: are monthly in arrears, either by monthly meter reading or, for contracted level of tests, on pricing matrices.

The Chemistry Analyzers have on-board metering systems. Refer to Metering Guidelines for Reagents, Controls, Calibrators and other materials. Billings will be monthly in arrears by meter reading for either minimum test volume as shown on the pricing matrix, or, if minimum is exceeded, actual tests completed and reported on disc at the end of the month per the definitions below.

G. Early Termination:

If a Government customer terminates an agreement prior to the contract term of 5 years (60 months) the contract pricing awarded will be adjusted. Pricing published is based on a 60 month term. However, upon early termination, alternate pricing, which is part of this contract, will apply.

INFORMATION FOR ORDERING ACTIVITIES – V797P-7090a (continued)

19. **Terms and conditions of Installation:** The government shall prepare the site at its own expense and in accordance with the specifications furnished by Beckman Coulter. Beckman Coulter will provide installation, start-up assistance and operator instructions and two operator/maintenance manuals. Installation will be completed as soon as practicable after delivery during normal working hours. The performance period shall commence on the date of the installation.
20. **Terms and Conditions of Repair Parts:** Repair parts for equipment and preventive maintenance are included. (See Item 18C above.)
21. **List of Service and Distribution Points:**

Beckman Coulter, Inc.
Western Distribution Center
15989 Cypress Avenue
Chino, CA 91710
22. **List of Participating Dealers:** None
23. **Preventive maintenance:** See Item 18C above
24. **Year 2000 Compliance:** All products currently manufactured are Year 2000 compliant.
25. **Environmental attributes:** Beckman Coulter, Inc. has programs in place to evaluate and improve the environmental aspects of our products as they are being developed. An example, is to improve packaging to make products more environmentally friendly.
26. **Data Universal Number System:** 153910070 Brea, California
091551650 Miami, Florida
27. **Central Contractor Registration database:** CCR number is the same as the DUNS number above. See the CCR database for all Contractor information required.

EXCLUSIONS from V797P-7090a Cost per Test/Cost per Reportable

1. Control serum and calibrators not manufactured by Beckman Coulter, Inc., i.e., not having Beckman Coulter catalog numbers.
2. Training for Biomedical Engineers.
3. Inside delivery for initial instrument shipment or subsequent movement and re-installation of a unit from one site to another, at the customer's request.
4. Cartridges for Open Channel Chemistry tests, and any reagents needed for those "User-defined" tests.
5. Open Market products that are not part of the list of Expendable Materials included for instrument operation.
6. Printer paper and printer cartridges.
7. AccuSense electrodes must be purchased. DxC requires 2 per year (P/N 467432).
8. DxC PRO blade assembly must be purchased (P/N 475885).
9. Autogloss must be purchased (P/N 657197).

SYNCHRON CX[®]4 PRO

This product is designed for laboratories that wish to perform their specialty testing on a dedicated analyzer than on their primary chemistry system such as the LX20 and CX9 ALX. The tests typically performed on the CX4 are therapeutic drug monitoring, drugs of abuse screening, lipid screens and/or diabetic testing. The CX4 on-board storage capacity is over 4,800 tests.

HIGH MAINTENANCE/COMPLEXITY CLINICAL CHEMISTRY ANALYZERS
Contract Number: V797P-7090a Special Item No.: 605-1a

Cost Per Test Results – SYNCHRON CX4 PRO

Cost Per Test, Volume and Instrument Schedule

Group	CX4 PRO / Annual Volume		
	75,000 - 99,999	100,000 - 149,000	150,000 - 199,999
Group A	\$0.24	\$0.20	\$0.16
Group B	\$0.53	\$0.44	\$0.35
Group C	\$1.54	\$1.40	\$1.15
Group D	\$2.36	\$2.23	\$2.22
Group E	\$2.88	\$2.82	\$2.71

Group G	\$2.57	\$2.51	\$2.38
Group H	\$2.69	\$2.77	\$2.46
Group I	\$1.57	\$1.50	\$1.40
Optional 24/7 SVC	\$0.04	\$0.03	\$0.02

HIGH MAINTENANCE/COMPLEXITY CLINICAL CHEMISTRY ANALYZERS

Contract Number: V797P-7090a Special Item No.: 605-1a

Cost Per Test – SYNCHRON CX4 PRO

All pricing matrices for Cost Per Reportable have an associated maximum reagent and consumable allotment (see associated allotment schedules)

Note: Quantities over maximum annual allotment will need to be purchased by the kit/box with 2% discount of 2003 Domestic List Price Book (Ref: 2003 Domestic Price Book)

Assumptions/Exclusions:

VA Clinical Chemistry Analyzer Exceptions Statement (CPT and CRR):

1. Reagents and supply quantities – based on annual testing with 3% repeat test rate for all reagent groups.

Annual period defined as 350 days of operation with three (3) shifts per day

Assumes 80% utilization efficiency

10% cartridge overfill **not** considered for this calculation

2. Controls and Calibrators:

Two (2) levels of controls for three (3) shifts per day

Calibrations based on specific assay and its stability

- 24 hrs stability
- 7 days stability
- 14 days stability
- 30 days stability

Extended Calibration (up to 90 days) **not** considered.

3. Specific Exclusions from Contract:

CX/LX Accusense electrodes must be purchased.

CX required 3 per year (P/N 469499); LX requires 2 per year (P/N 467432).

LX20 PRO blade assembly (P/N 475895) and Autogloss (P/N 657197) must be purchased.

4. General Exclusions from Contract:

Service/maintenance and consumables for peripheral printers provided with instruments.

Water systems will only be provided to new customers who have been provided a water system by Beckman Coulter, Inc. for a previous chemistry installation.

Control serum and calibrators not manufactured by Beckman Coulter, Inc., i.e., non-BCI catalog numbers.

Training for Biomedical Engineers.

Inside delivery for initial instrument or subsequent movement and re-installation of unit within facility at customer request.

Cartridges for Open Channel testing as well as any reagents related to the User Defined Reagent (UDR) tests.

Open market products, which are not included on the Expendable Materials list, provided with the instrument.

5. Service – Chemistry Instruments:

Standard service package for Beckman Coulter, Inc. customers is 8 hours/day for 5 days/week; full service package (24/7) is available at 40% above the standard service charge, which varies by analyzer/instrument.

6. Operator Training:

High-Complexity Instruments: training for two initial operators for high-complexity instruments, as designated in the contract, includes room, board, and airfare for off-site training.

Low-Complexity Instruments: training for two initial operators for low-complexity instruments, as designated in the contract, is on-site at time of instrument installation.

Prices offered are the lowest GPO Price or GSA at 9% annual interest.
 Service is offered at a 15% discount from List Price in 2005 Service Agreement Handbook.

SYNCHRON CX[®]5 PRO

This product is designed to meet the testing needs of laboratories performing low to moderate sample volumes, performing 100,000 to 500,000 tests per year. The CX5 on-board storage capacity is over 11,000 tests, thereby requiring the operator to manage the reagent inventory once a week to once per month. For laboratories that require fast turn around time for their electrolyte samples, the CX5 will perform the panel in 52 seconds. The over all performance of the CX5 is 600 tests per hour.

UniCel® DxC 600 and DxC 800

Lab professionals today must meet the demands of an ever-growing workload with shrinking resources, both human and financial. Beckman Coulter can help your laboratory stay on top of these challenges with the next generation – the UniCel® DxC 600 and DxC 800 Clinical Systems.

- The DxC 600 PRO features an **onboard capacity of 65 reagents** and a peak throughput of **990 tests per hour**.
- The DxC 800 PRO features an **onboard capacity of 70 reagents** to help your lab consolidate workstations and a peak throughput of **1440 tests per hour**.

Both systems offer:

- Enhanced user **software that's very intuitive and easy to learn**.
- Low maintenance requirements – **no daily maintenance** and minimal weekly maintenance.
- **Closed-tube sampling capability** to enhance your laboratory's **performance**, while **reducing exposure to biohazards** and the potential for errors.

*DxC 800 PRO includes:

- Closed Tube Sampling (CTS)
- NIPIA (Near Infrared Particle Immunoassay) detection system for HIGHsensitivity C-Reactive Protein (CRP).

UniCel® DxC 600i Clinical System

UniCel® DxC 600i Synchron® Access® Clinical System

As a laboratory professional, you know the testing process slows when exceptions occur. And time lost to retesting drains resources. So what's the solution? It's as simple as the new UniCel DxC 600i Clinical System from Beckman Coulter.

Say goodbye to exceptions handling and hello to increased performance. With the DxC 600i, virtually all tests are routine. This newest member of the growing UniCel family of instruments consolidates both our leading chemistry and innovative immunoassay technologies into one efficient workstation. A single point of entry for both chemistry and immunoassay testing means faster, more reliable results.

- Provides one of the largest onboard menus available today.
- Features a total menu of more than 150 chemistry and immunoassay tests*.
- Increases productivity and safety with the unique closed-tube sampling (CTS) and closed-tube aliquotting (CTA) capabilities.
- Offers proven features such as serum indices and clot detection and correction to help ensure accurate results as well as fewer sample exceptions.

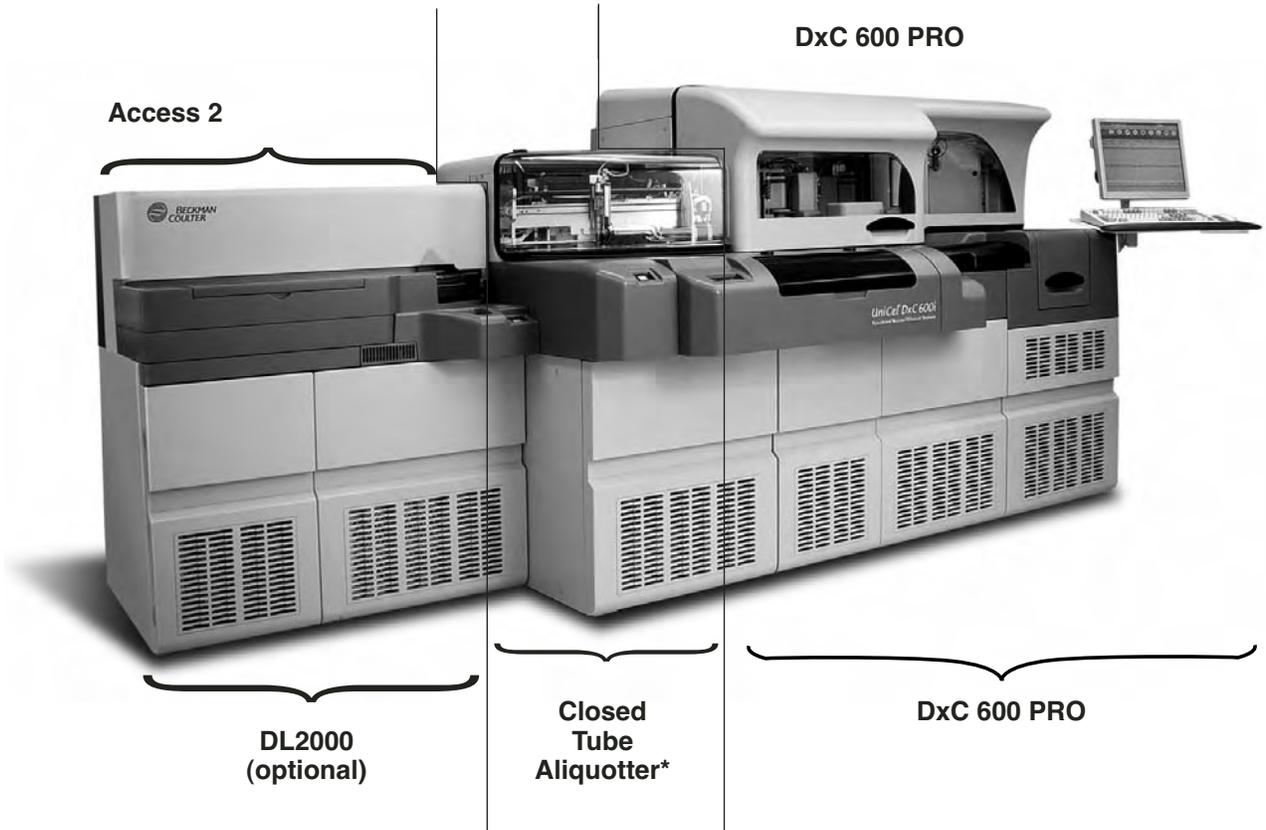

The UniCel DxC 600i offers the perfect blend of peak performance, exceptional capacity and simplicity of operation.

Chemistry volumes for DxC 600 PRO start at 350,000 tests – Annual for CPT and at 400,000 tests – Annual for CPT and CPT.

**Not all assays available in all countries.*

HIGH MAINTENANCE/COMPLEXITY CLINICAL CHEMISTRY ANALYZERS
Contract Number: V797P-7090a Special Item No.: 605-1a

UniCel® DxC 600i Clinical System Components

*Hardware lease payment for CTA is \$2,600.00.

Laboratory Automation

By offering a full range of flexible automation systems—from system-based through comprehensive—Beckman Coulter offers laboratories multiple points of entry into the realm of automation and helps each lab find one that is appropriate and cost-effective.

Systems

- Power Processor

Accessories

- Aliquot Upgrade
- Single Connection (UniCel® Dx C 800)
- Single Connection (UniCel® Dx C 600)
- Dxl Connector Unit
- 1,000-Tube Stockyard
- 3,000-Tube Refrigerated Stockyard
- Secondary Decapper
- Recapper

Hardware Option/upgrades are available to add to existing Cost per Test instrument installations on a monthly payment basis, as listed above. All consumables are excluded, and if required must be purchased separately.

Standard 5-day business hours and 24 hours/7 days per week Extended Business Hours service coverage.

Training is on-site at time of instrument installation, and annually as requested.

*Minimum of 12 monthly payments.

Exclusions for Aliquot Upgrade:

Aliquotter Tips
 Transfer/Secondary Tubes, 13 x 100 mm
 Labels, Aliquot Upgrade
 Transfer/Secondary Tubes, 13 x 75 mm

Catalog Number:

800257
 2910034
 A16614
 800256

Exclusion for Recapper:

Cap, Blue Recapper

Catalog Number:

A17638

Modification 12, effective 7-1-2008

Reagent Planning Guide

Reagent and Supply Quantities

Annual reagent and supply quantities will be limited to the amount of reagent specified by the Beckman Coulter Lab IQ Reagent Planner program (modifications to quantities are not allowed) obtainable from the Beckman Coulter Sales Representative. Supplies and reagents for non-metered systems must be set up on a 12-month ship schedule. If additional reagent or supplies are needed, either an adjustment to the number of annual tests may be made or they can be purchased by the box at a 25% discount off of list price. One copy of the Lab IQ will be given to the facility as a reference and one copy will be required as part of the Order Process.

Controls:

2 levels of controls for 1 shift a day will be provided. Additional controls may be purchased.

Exclusions: are identified in this proposal on an instrument-specific basis.

Service:

8 x 5 service included (for the 24 x 7 service package, add 40% to the basic 8 x 5 price).

UDR:

User defined reagents and supplies are not supplied under the Cost per Test or the Cost per Reportable Result program.

Reagent Planning Guide

Reagent and Supply Quantities

Annual reagent and supply quantities will be limited to the amount of reagent specified by the Beckman Coulter Lab IQ Reagent Planner program (modifications to quantities are not allowed) obtainable from the Beckman Coulter Sales Representative. Supplies and reagents for non-metered systems must be set up on a 12-month ship schedule. If additional reagent or supplies are needed, either an adjustment to the number of annual tests may be made or they can be purchased by the box at a 25% discount off of list price. One copy of the Lab IQ will be given to the facility as a reference and one copy will be required as part of the Order Process.

Controls:

2 levels of controls for 1 shift a day will be provided. Additional controls may be purchased.

Exclusions: are identified in this proposal on an instrument-specific basis.

Service:

8 x 5 service included (for the 24 x 7 service package, add 40% to the basic 8 x 5 price).

UDR:

User defined reagents and supplies are not supplied under the Cost per Test or the Cost per Reportable Result program.

INFORMATION FOR ORDERING ACTIVITIES
V797P-7090a

1. Table of Awarded Special Item Numbers:

605-1a	Clinical Chemistry Analyzers: High Complexity (Off-site training – two operators trained) SYNCHRON LX 20, SYNCHRON LX 4201, SYNCHRON CX9 ALX, SYNCHRON CX7 DELTA, SYNCHRON CX 5 DELTA, and CX 4 DELTA.
605-1b	Clinical Chemistry Analyzers: Low complexity (On-Site training) SYNCHRON CX3 DELTA.

2. Maximum Order:

None

3. Minimum Order:

Minimum per each instrument model

4. Geographic Coverage:

Continental U.S., Hawaii and District of Columbia
(Alaska, Puerto Rico and U. S. Trust territories excluded.)

5. Points of Production:

605-1a,	Brea (Orange County) California
605-1a	IDS – Kumamoto, Japan (Automation)
605-1b	Brea (Orange County) California

6. Discounts:

Prices shown are net of all discounts
(1/2% Industrial Funding Fee will be added to each invoice)

7. Quantity Discounts:

None

8. Payment Terms:

Net 30 days from date of invoice

9. Credit Card:

Accepted, but no further discount given for credit card use.

10. Foreign Items:

None

11. Time of delivery:

90 days after receipt of order
Urgent requirement pricing may be negotiated at the time of order

12. F.O.B. Points:

Destination within Geographic coverage of contract.

13. Ordering Address:

Beckman Coulter, Inc.
Diagnostics Division (W-584)
200 S. Kraemer Blvd.
Brea, CA 92821
1-800-526-3821 – FAX 714-993-8884

14. Payment Address:

Beckman Coulter, Inc.
Dept. CH 10164
Palatine, IL 60055-0164

HIGH MAINTENANCE/COMPLEXITY CLINICAL CHEMISTRY ANALYZERS
Contract Number: V797P-7090a Special Item No.: 605-1a

INFORMATION FOR ORDERING ACTIVITIES – V797P-7090a (continued)

15. **Warranty Provision:** All instrumentation will be warranted for the term of the pricing matrix chosen by each customer, up to five years.
16. **Export Packaging:** Not applicable
17. **Terms/Conditions of Government Commercial Credit Card Acceptance:**
No additional discounts given for using Credit Card.
18. **Terms and Conditions of Rental, Maintenance and Repair:** Contractor will furnish:
- A. Instrumentation,** all supplies and consumables necessary to operate the equipment for all contracted tests. (See individual pricing sheets).
 - B. Training** for two initial operators for high complexity instrumentation, and indicated in item number 1 above, includes room, board, and airfare for off-site training. Training for low complexity analyzers, as indicated in item number 1 above, is on-site at time of instrument installation. One additional on-site training, per instrument for each completed year of customer agreement is included upon request.
 - C. Maintenance and Repair:** Customer is responsible for any daily routine maintenance. Beckman Coulter will perform ongoing preventive maintenance and emergency maintenance necessary to fulfill the customer's test requirements. Emergency maintenance will be provided within 24 hours of notification of malfunction. Beckman Coulter will provide all tools, parts and labor needed for emergency or preventive maintenance and incurs all associated travel costs.
 - D. BILLINGS** will be monthly in arrears, either by monthly meter reading or, for contracted level of tests on pricing matrices. If monthly minimum is not met, the minimum from the applicable pricing matrix will be billed. All non-metered billings will be audited on a quarterly basis for potential adjustment, per the contract terms.

1) COST PER TEST, OPTION B, and COST PER OUTCOME Options:

605-1a SYNCHRON Chemistry Analyzers:

CX 3/4/5/7/9 have on board meters. Classic Cost per Test customers are billed by the meter, for patient tests and reruns only. Calibrations and controls are not billed. Calibrators and control materials with Beckman Coulter catalog numbers are included at no additional charge, except for Group F (user-defined chemistries). Billing will be by monthly meter reading for either minimum monthly test volume as shown on pricing matrix, or, if minimum is exceeded, actual tests completed and reported on disc at the end of each month.

Features **included** in Classic Cost per Test that are excluded in Option B are:

- Airfare is included for training
- Field engineering service is 7 days per week, 24 hours per day.
- Spinchron centrifuge is included
- Maintenance of water system is included

HIGH MAINTENANCE/COMPLEXITY CLINICAL CHEMISTRY ANALYZERS

Contract Number: V797P-7090a Special Item No.: 605-1a

INFORMATION FOR ORDERING ACTIVITIES – V797P-7090a (continued)

CX 3/4/5/7/9-Option B: Customers are billed by the meter, for patient tests and reruns only. Calibrators having Beckman Coulter catalog numbers are supplied, but not control material, for this pricing matrix. Only Group A & B tests count toward steps on the test volume ladder for pricing. There is an incremental charge of \$2,500 /month if the monthly test volume of Groups A & B is less than 10,000 tests/month in those facilities where the analyzer has a dedicated usage, i.e., to do Drugs of Abuse, Therapeutic Drug testing, or STAT testing. Option B excludes some features included in the Classic Cost per Test above. (Field engineering service is provided 5 days per week, 8:00 a.m. to 5:00 p.m.)

LX20/LX4201 have on-board meters that record patient results, calibrations, controls (having Beckman Coulter catalog numbers), and maintenance related tests. There is an allowance for up to 10% for calibrations, controls, repeat testing and waste. The charge for tests reported each month is calculated, and reduced by 10% for billing purposes.

2) COST PER REPORTABLE RESULT Option:

All pricing matrices for Cost per Test or Cost per Outcome are the basis for the Cost per Reportable program. The following conditions apply for all CPRR program participants.

Only patient tests are billed

Allowance for up to 10% for Calibrations, Controls, and re-runs within each test group

Excess above 10% in each test group will be billed at the test group rate

CPRR program participants will be REQUIRED to report testing monthly for additional reagents to be shipped beyond scheduled orders, based on estimates. Billings will be audited quarterly for potential adjustments.

EARLY TERMINATION:

If a government facility terminates an agreement prior to five years for the convenience of the government, pricing will revert to original awarded pricing for the purposes of Early Termination Clause. Sixty (60) months pricing is published for all product lines. Alternate year pricing is part of the contract and available upon special request.

19. **Terms and conditions of Installation:** The government shall prepare the site at its own expense and in accordance with the specifications furnished by the contractor. The contractor will provide installation, start-up assistance, operator instructions and two operator/maintenance manuals. Installation will be completed as soon as practicable after delivery during normal working hours. The performance period shall commence on the date of the installation.
20. **Terms and Conditions of Repair Parts:** Repair parts for equipment and preventive maintenance are included. (See Item 18C above.)
21. **List of Service and Distribution Points:**

Beckman Coulter, Inc.
200 S. Kraemer Blvd.
Brea, CA 92821

Beckman Coulter, Inc.
11800 S. W. 147 Avenue
Miami, FL 33196

HIGH MAINTENANCE/COMPLEXITY CLINICAL CHEMISTRY ANALYZERS
Contract Number: V797P-7090a Special Item No.: 605-1a

INFORMATION FOR ORDERING ACTIVITIES – V797P-7090a (continued)

- 22. **List of Participating Dealers:** None
- 23. **Preventive maintenance:** See Item 18C above
- 24. **Year 2000 Compliance:** All products currently manufactured are Year 2000 compliant.
- 25. **Environmental attributes:** Beckman Coulter, Inc. has programs in place to evaluate and improve the environmental aspects of our products as they are being developed. An example, is to improve packaging to make products more environmentally friendly.
- 26. **Data Universal Number System:** 153910070 Brea, California
053162053 Miami, Florida
- 27. **Central Contractor Registration database:** CCR number is the same as the DUNS number above. See the CCR database for all Contractor information required.

HIGH MAINTENANCE/COMPLEXITY CLINICAL CHEMISTRY ANALYZERS
Contract Number: V797P-7090a Special Item No.: 605-1a

EXCLUSIONS from V797P-6553a
Cost per Reportable/Cost per Test/Cost per Outcome

1. Service/maintenance and consumables for peripheral printers provided with instruments.
2. Water systems will only be provided to new customers that have not already been provided a water system by Beckman Coulter for a previous Chemistry installation.
3. Control serum and calibrators not manufactured by Beckman Coulter, Inc., i.e., not having Beckman Coulter catalog numbers.
4. Training for Biomedical Engineers.
5. Inside delivery for initial instrument shipment or subsequent movement and re-installation of a unit from one site to another, at the customer's request.
6. Cartridges for Open Channel Chemistry tests, and any reagents needed for those "User-defined" tests.
7. Open Market products that are not part of the list of Expendable Materials included for instrument operation.
8. EXCLUSIONS for Option B – See Supplement 14, page 29 for specifics.
 - a. Airfare is NOT included for training
 - b. SPINCHRON Centrifuge is NOT included
 - c. Full Service is NOT included. (Field engineering service is provided 5 days per week, 8 a.m. to 5 p.m.)
 - d. Maintenance on water system is NOT included.

SYNCHRON LX®4201

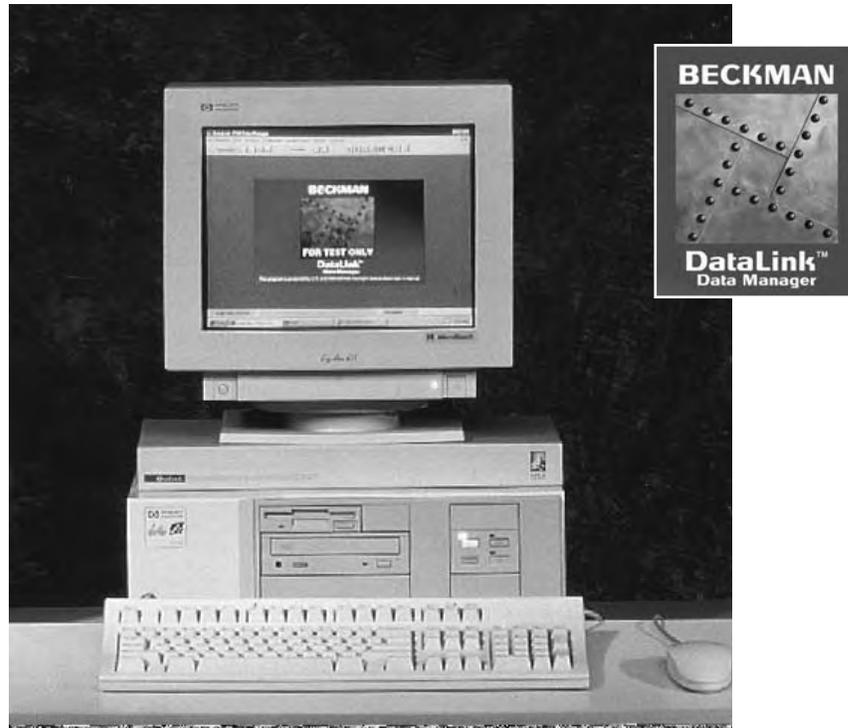

This product was designed to meet the testing needs of laboratories performing very high sample volumes, performing 1,750,000 to 4,000,000 tests per year. The system is two LX20's linked together through a common data manager system called the DataLink™. The LX4201 on-board storage capacity is over 120,000 tests thereby requiring the operator to manage the reagent inventory once per month to every 10 days, depending on the annual test volume. For laboratories that require fast turnaround time for their STAT samples, the LX4201 will perform an 11-chemistry STAT panel in 42 seconds. The overall performance of the LX4201 is 2880 tests per hour.

COST PER OUTCOME PROGRAM **LX4201 with DataLink, Five-Year Pricing**

Annual Volume Commitment	Group A	Group B	Group C	Group D	Group F	Group G	Group H

DataLink™ Data Manager

The DataLink™ Data Manager is a computer software and hardware system that connects up to three Beckman Coulter chemistry instruments through a single user console. It provides a powerful integrated clinical laboratory solution for advance workflow and results management capabilities. DataLink will enhance the operation of any existing laboratory information system (LIS).

The DataLink data management system is available for an additional charge of \$0.01 per test at volumes at or below 24,999 per month and \$0.005 per test at volumes of 25,000 tests per month and above.

SYNCHRON LX[®]20

This product was designed to meet the testing needs of laboratories performing very high sample volumes, performing 750,000 to 2,000,000 tests per year. The LX20 on-board storage capacity is over 60,000 tests thereby requiring the operator to manage the reagent inventory once per month to every 10 days, depending on the annual test volume. For laboratories that require fast turnaround time for their STAT samples, the LX20 will perform an 11-chemistry STAT panel in 42 seconds. The over all performance of the LX20 is 1440 tests per hour.

SYNCHRON CX[®]9 ALX

This product is designed to meet the testing needs of laboratories performing low to moderate sample volumes, performing 500,000 to 800,000 tests per year. The CX9 ALX on-board storage capacity is over 19,000 tests, thereby requiring the operator to manage the reagent inventory twice to four times per month. For laboratories that require fast turn around time for their STAT samples, the CX9 ALX will perform a 9-chemistry STAT panel in 52 seconds. The over all performance of the CX9 ALX is 900 tests per hour.

HIGH MAINTENANCE/COMPLEXITY CLINICAL CHEMISTRY ANALYZERS

Contract Number: V797P-7090a Special Item No.: 605-1a

Additional CX9 ALX instruments (including centrifuge, water, and maintenance) may be added to any other SYNCHRON instrument by adding the following pricing to all tests in Groups A, B, C, D, G and H at the appropriate test level and agreement duration.

* Pricing includes CX9, SPINCHRON Centrifuge with rotor, water system (or upgrade of current water system to meet requirements), two initial training slots (with airfare), one additional training slot per instrument, per completed customer agreement year is included upon request, preventive and emergency maintenance of instrumentation and water system for duration of agreement.

SYNCHRON CX[®]7

This product is designed to meet the testing needs of laboratories performing low to moderate sample volumes, performing 400,000 to 800,000 tests per year. The CX7 on-board storage capacity is over 17,000 tests, thereby requiring the operator to manage the reagent inventory twice to four times per month. For laboratories that require fast turn around time for their STAT samples, the CX7 will perform a 7-chemistry STAT panel in 52 seconds. The over all performance of the CX7 is 825 tests per hour.

* Pricing includes CX5 DELTA, SPINCHRON Centrifuge with rotor, water system (or upgrade of current water system to meet requirements), two initial training slots (with airfare), one additional training slot per instrument, per completed customer agreement year is included upon request, preventive and emergency maintenance of instrumentation and water system for duration of agreement.

SYNCHRON CX[®]4 DELTA

This product is designed for laboratories that wish to perform their specialty testing on a dedicated analyzer than on their primary chemistry system such as the LX20 and CX9 ALX. The tests typically performed on the CX4 are therapeutic drug monitoring, drugs of abuse screening, lipid screens and/or diabetic testing. The CX4 on-board storage capacity is over 4,800 tests.

HIGH MAINTENANCE/COMPLEXITY CLINICAL CHEMISTRY ANALYZERS

Contract Number: V797P-7090a Special Item No.: 605-1a

Additional CX4 DELTA instruments (including centrifuge, water, and maintenance) may be added to any other SYNCHRON instrument by adding the following pricing to all tests in groups A, B, C, D, G, and H at the appropriate test level and agreement duration.

INSTRUMENT – SYNCHRON CX4 DELTA*

* Pricing includes CX4 DELTA, SPINCHRON Centrifuge with rotor, water system (or upgrade of current water system to meet requirements), two initial training slots (with airfare), one additional training slot per instrument, per completed customer agreement year (airfare is included upon request), preventive and emergency maintenance of instrumentation and water system for duration of agreement.

SYNCHRON CX[®]3 DELTA

This product is designed to handle the critical care menu testing requirements for the busy laboratory. The CX3 is able to perform a nine-test panel in 52 seconds. This instrument will compliment any chemistry analyzer as well as our CX9 ALX and LX20.

HIGH MAINTENANCE/COMPLEXITY CLINICAL CHEMISTRY ANALYZERS

Contract Number: V797P-7090a Special Item No.: 605-1a

Additional CX3 New instruments (applies to installed base as of 10-1-99) may be added to any other SYNCHRON instrument by adding the following pricing to Group A tests at the appropriate test level and agreement duration.

HIGH MAINTENANCE/COMPLEXITY CLINICAL CHEMISTRY ANALYZERS
Contract Number: V797P-7090a Special Item No.: 605-1a

INFORMATION FOR ORDERING ACTIVITIES FOR OPTION B

EQUIPMENT

The model, type (new or remanufactured) and quantity of instruments will be decided by Beckman Coulter in agreement with the government facility. Beckman Coulter guarantees the recommended equipment will perform the required testing volume as specified by the government user. In the case where remanufactured equipment is utilized, Beckman Coulter guarantees the performance and warranty to be the same as new equipment.

TEST COUNTS / CONSUMABLES

- Beckman Coulter on-board meters will count tests where available. If meters are not available, tests will be counted by new test volume per kit. Non-metered agreements will be audited quarterly and adjusted retroactively.
- Government-owned equipment may be included in multiple placement agreements at schedule pricing (no discount for owned instrumentation).
- Only Group A and B tests will count toward volume discounts.
- Calibrations, controls and tests performed during preventive maintenance and repair service are not counted and are not charged. Repeats are counted and charged.
- Only Beckman calibrators will be provided as required. Control material is excluded from this offer.

TRAINING / SERVICE / PERIPHERALS

- Training for two persons per new placement instrument is provided prior to installation, if required. (Exception: One on-site training per placement of SYNCHRON CX3)
- Airfare to and from training IS NOT included in this offer.
- Extra training is available for \$2,500 per person per instrument.
- Service for agreement period will be provided during normal working hours (Monday - Friday, 8:00 AM – 5:00 PM).
- Spinchron centrifuge (with service) & rotor IS NOT included in this offer.
- Beckman Coulter will provide a suitable water system (or upgrade existing system). Maintenance of the water system is the customer's responsibility.

SPECIAL TERMS AND CONDITIONS

- Individual facilities (or facilities on a single agreement) may qualify for additional discounts to be rebated annually on the agreement anniversary date. These rebates would be applied to total invoiced dollars for the preceding 12-month period (excluding Industrial Funding Fee). The rebates will be in the form of a credit applied to the individual agreement and may be used by the facility to offset future invoices of that agreement or to purchase additional equipment. Additional discounts would be as follows:

Less than 1,000,000 tests/year = no discount (priced per schedule)
1,000,000 to 1,999,999 tests/year = 5%
2,000,000 to 2,999,999 tests/year = 10%
Over 3,000,000 tests/year = 15%

- In those facilities where an analyzer is dedicated to Drugs of Abuse, Therapeutic Drug testing or STAT testing (as mutually determined by Beckman Coulter and government facility), either an incremental charge of \$2,500 per month will be applied in addition to the cost/test prices of actual tests performed, or the billed test volume will be inflated by adding the appropriate number of Group A tests to reach minimum monthly test volume. The lesser amount will be the monthly billing. If an individual analyzer volume falls below 10,000 tests per month, either an incremental charge of \$2,500 per month will be applied in addition to the cost/test prices of actual tests performed, or the billed test volume will be inflated by adding the appropriate number of Group A tests to reach minimum monthly test volume. The lesser amount will be the monthly billing.
- In the event a facility requires a special configuration or quantity of instruments, instrumentation will be priced in accordance with published schedule. When multiple units are required to perform the specified work load noted above, the incremental per test charge will apply.

EARLY TERMINATION:

If a government facility terminates an agreement prior to five years for the convenience of the government, pricing will revert to original awarded pricing for the purposes of Early Termination Clause.

ALL OTHER TERMS AND CONDITIONS AS ORIGINALLY AWARDED REMAIN THE SAME UNLESS PREVIOUSLY MODIFIED.

HIGH MAINTENANCE/COMPLEXITY CLINICAL CHEMISTRY ANALYZERS
Contract Number: V797P-7090a Special Item No.: 605-1a

OPTION B – FIVE-YEAR PRICING

Includes instrument, consumables, calibrators, service (8 a.m. – 5 p.m., 5 days/week) water system (w/o maintenance) two training slots per new placement of CX4/CX5/CX7 (room, board & tuition – w/o airfare). CX3 training is on-site at time of unit installation. Additional instrument pricing is added to primary pricing and charged for all tests performed on all instruments. See page #2 (ordering information) for further details.

HIGH MAINTENANCE/COMPLEXITY CLINICAL CHEMISTRY ANALYZERS

Contract Number: V797P-7090a Special Item No.: 605-1a

OPTION B – FIVE-YEAR PRICING

Includes instrument, consumables, calibrators, service (8 a.m. – 5 p.m., 5 days/week) water system (w/o maintenance) two training slots per new placement of CX4/CX5/CX7 (room, board & tuition – w/o airfare). CX3 training is on-site at time of unit installation. Additional instrument pricing is added to primary pricing and charged for all tests performed on all instruments.

Laboratory Automation

By offering a full range of flexible automation systems—from system-based through comprehensive—Beckman Coulter offers laboratories multiple points of entry into the realm of automation and helps each lab find one that is appropriate and cost-effective.

Systems

- Power Processor

Accessories

- Aliquot Upgrade
- Chem Xpress Upgrade
- Hematology Outlet Upgrade

HIGH MAINTENANCE/COMPLEXITY CLINICAL CHEMISTRY ANALYZERS
Contract Number: V797P-7090a Special Item No.: 605-1a

Automation Upgrades Added to Cost Per Test

Catalog Number	Description	12 months*	24 months	36 months	48 months	60 months
6605528	Power Processor	\$22,025.00	\$12,371.66	\$9,104.99	\$7,484.16	\$6,514.16
6605582	Chem Xpress Upgrade	\$28,632.50	\$15,643.33	\$11,264.71	\$9,091.66	\$7,791.08
6605594	Hematology Outlet Upgrade	\$4,405.00	\$2,539.18	\$1,892.79	\$1,572.10	\$1,380.18
6605574	Aliquot Upgrade	\$26,430.00	\$14,858.89	\$10,858.89	\$8,900.00	\$7,727.67

Hardware Option/upgrades are available to add to existing Cost per Test instrument installations on a monthly payment basis, as listed above. All consumables are excluded, and if required must be purchased separately.

Standard 5-day business hours service coverage, with 24-hour telephone troubleshooting, is included.

Training is on-site at time of instrument installation, and annually as requested.

*Minimum of 12 monthly payments.

Exclusions for Aliquot Upgrade:	Catalog Number:
Aliquotter Tips	800257
Transfer/Secondary Tubes	2910034
Labels, Aliquot Upgrade	800255

Modification 42, effective 12-1-2000

HIGH MAINTENANCE/COMPLEXITY CLINICAL CHEMISTRY ANALYZERS
Contract Number: V797P-7090a Special Item No.: 605-1a

**Monthly Payment Schedule for “PRO” upgrade:
 Prior Cost per Test contract V797P-6553a**

Catalog Number	Description	12 months*	24 months	36 months	48 months	60 months
476878	CX PRO Upgrade	\$1,862.40	\$988.40	\$697.40	\$538.80	\$442.00
476101	LX20 PRO Upgrade	\$4,656.00	\$2,496.00	\$1,743.50	\$1,347.00	\$1,105.00
476101	LX4201 PRO Upgrade	\$9,312.00	\$4,992.00	\$3,487.00	\$2,694.00	\$2,210.00
2 kits for two LX20s						

CX PRO and LX PRO shipped directly from manufacturing will have part number of the finished product.

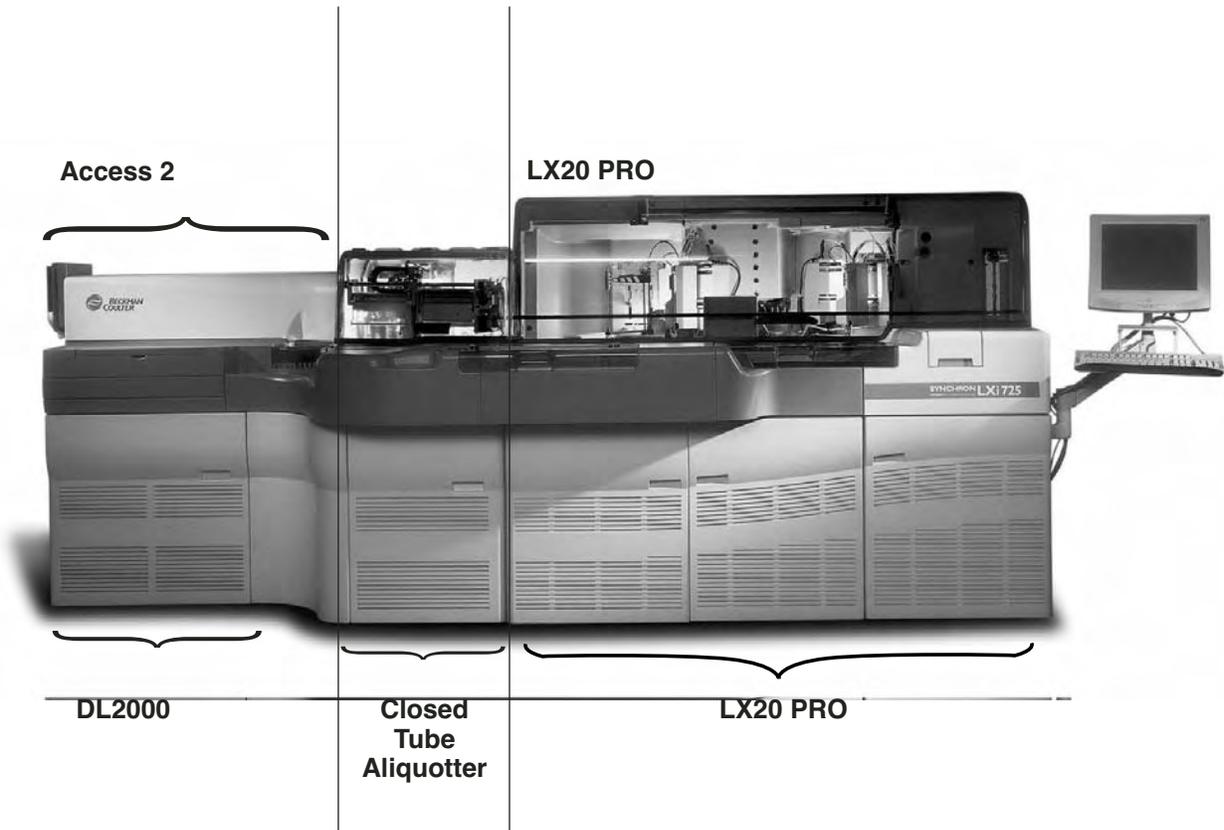

Current Cost per Testt/Cost per Outcome pricing plus monthly “PRO” upgrade = Total Monthly Billing.

- 486200 CX4 PRO
- 468202 CX5 PRO
- 473541 CX9 PRO
- 476112 LX20 PRO

HIGH MAINTENANCE/COMPLEXITY CLINICAL CHEMISTRY ANALYZERS

Contract Number: V797P-7090a Special Item No.: 605-1a

SYNCHRON LX[®]i 725 Clinical System

CTA ACCESSORY: Part Number 388464 or 389569
(Includes Access 2, DL2000, Closed Tube Aliquotter)

12 months	24 months	36 months	48 months	60 months
\$15,392.81	\$7,941.79	\$5,463.73	\$4,231.69	\$3,498.63

Service for the **Closed Tube Aliquotter** must be added as a separate line item, since it is not included in the CTA Accessory hardware price. Prices are monthly for 24-hour/7-day maintenance coverage. (If one year pricing is chosen, the maintenance is included as Warranty coverage.)

Closed Tube Aliquotter Service

24 months	36 months	48 months	60 months
\$419.58	\$559.44	\$629.38	\$671.33

Initial training is for three key operators and includes tuition, room, board, and airfare. Annual training in subsequent years is an option, and excludes airfare.

HIGH MAINTENANCE/COMPLEXITY CLINICAL CHEMISTRY ANALYZERS

Contract Number: V797P-7090a Special Item No.: 605-1a

Cost Per Reportable Results – SYNCHRON LX20 PRO

All pricing matrices for Cost Per Reportable have an associated maximum reagent and consumable allotment (see associated allotment schedules)

Note: Quantities over maximum annual allotment will need to be purchased by the kit/box with 2%% discount of 2003 Domestic List Price Book (Ref: 2003 Domestic Price Book)

Assumptions/Exclusions:

VA Clinical Chemistry Analyzer Exceptions Statement (CPT and CRR):

1. Reagents and supply quantities – based on annual testing with 3% repeat test rate for all reagent groups.

Annual period defined as 350 days of operation with three (3) shifts per day

Assumes 80% utilization efficiency

10% cartridge overfill **not** considered for this calculation

2. Controls and Calibrators:

Two (2) levels of controls for three (3) shifts per day

Calibrations based on specific assay and its stability

- 24 hrs stability
- 7 days stability
- 14 days stability
- 30 days stability

Extended Calibration (up to 90 days) **not** considered.

3. Specific Exclusions from Contract:

CX/LX Accusense electrodes must be purchased.

CX required 3 per year (P/N 469499); LX requires 2 per year (P/N 467432).

LX20 PRO blade assembly (P/N 475895) and Autogloss (P/N 657197) must be purchased.

4. General Exclusions from Contract:

Service/maintenance and consumables for peripheral printers provided with instruments.

Water systems will only be provided to new customers who have been provided a water system by Beckman Coulter, Inc. for a previous chemistry installation.

Control serum and calibrators not manufactured by Beckman Coulter, Inc., i.e., non-BCI catalog numbers.

Training for Biomedical Engineers.

Inside delivery for initial instrument or subsequent movement and re-installation of unit within facility at customer request.

Cartridges for Open Channel testing as well as any reagents related to the User Defined Reagent (UDR) tests.

Open market products, which are not included on the Expendable Materails list, provided wiht the instrument.

5. Service – Chemistry Instruments:

Standard service package for Beckman Coulter, Inc. customers is 8 hours/day for 5 days/week; full service package (24/7) is available at 40% above the standard service charge, which varies by analyzer/instrument.

6. Operator Training:

High-Complexity Instruments: training for two initial operators for high-complexity instruments, as designated in the contract, includes room, board, and airfare for off-site training.

Low-Complexity Instruments: training for two initial operators for low-complexity instruments, as designated in the contract, is on-site at time of instrument installation.

HIGH MAINTENANCE/COMPLEXITY CLINICAL CHEMISTRY ANALYZERS

Contract Number: V797P-7090a Special Item No.: 605-1a
