

Need Continuing Education?

The South Central MIRECC hosts
a *Bringing Science to Practice* web-based presentation

entitled

“Linguistic Indicators of Emotional Processing in Therapy”

by

Scott A. Cardin, Ph.D.

Dr. Cardin is a staff psychologist at the VA Biloxi Health Care System. He received his Ph.D. in Counseling Psychology from Texas A & M University and completed a postdoctoral fellowship with the South Central MIRECC. His research interests include the verbal processing of emotions and examining how spoken language causes emotional states and unconsciously regulates how we think and behave.

2/15/07

12:00 PM (noon) – 1:00 PM CT

The PowerPoint presentation will be available 2/14/07 at

<http://vaww.visn16.med.va.gov/mirecc/mirecc.htm>

VANTS #: 1-800-767-1750, access code 45566#

Learning objectives:

- 1) provide general history of theory and research on verbal processing of emotions
- 2) outline new theory and research on verbal processing of emotions
- 3) present future directions for research
- 4) present clinical implications

The VA Employee Education System (EES) has accredited this program for 1.0 hour continuing educational credit for mental health practitioners, including psychiatrists, psychologists, social workers, counselors, and nurses.
