

CHAPTER 4. REHABILITATION RESEARCH AND DEVELOPMENT BUDGET POLICIES

4.01 REHABILITATION PROJECT SUPPORT

Budgetary control of Rehab R&D projects is centralized. Individual projects are funded annually, by fiscal year, based on approved project budgets.

4.02 FACILITY SUPPORT

a. Financial support to health care facilities research administration for Rehab R&D projects includes research administrative support, an amount separate from the project's direct costs, to defray the cost of maintaining an administrative office, animal research facilities, and common research resources. (See pt. 11, par. 401.) Proposals should include in their budgets only project direct costs.

b. The amount of "administrative" funding to be provided by Rehab R&D Service will be determined for each facility based on assessment of need.
